

EXA INFOTECH (P) LTD – CHANGING THE WAY BUSINESSES ARE RUN

About 15 years back if you asked any Company whether they had any ERP solution for their manufacturing unit they would have just stared at your face not knowing what to say. Today all large Corporate are run on ERP and most of the SME's are moving on towards ERP implementation in their units.

So what is this ERP and what are its advantages for a small or medium enterprise? Enterprise Resource Planning, or ERP as it is popularly called, is advanced software for Companies helping them to integrate all departments or even different units together into a single platform that runs on a single database. Imagine knowing what your stores or marketing department is doing, sitting on a single computer. That is the power of knowledge which ultimately results into vast savings for the Company.

Rajesh Handa

Director
Exa Infotech Pvt Ltd

The position has rapidly changed today compared to mid 1990's when only a few ERP software such as SAP, BAAN, ORACLE APPS, MICROSOFT NAVISION were available and which were beyond the financial reach of SME's. And thus, EXA was born, with a small capital but a passion and zeal to do what others had not even thought of. EXA was promoted in the year 1997 with the single objective of providing integrated and seamless solutions for businesses to run efficiently and effortlessly. **eRpro** was launched in 1999 after almost two years of research and development. EXA, thus, became a provider of strategic technology resources and products. Their primary business focus and core

competency even today is to provide customers with End-to-End Solutions in the area of emerging technologies, designed on world class platforms – the technologically for the new millennium. EXA also aimed to dispel the myth that such solutions were meant for Large Corporate only. Pricing their products reasonably, they intended to take it to the masses for bulk consumption.

Today they have separate solutions for various industries and services.

erPro Manufacturing

erPro Trading

erPro Construction

erPro Jewel

erPro CRM

eRPro runs on Oracle, by far the best available technologies for faster data processing and customized reporting systems.

The client list today boasts of the who's who of the Indian industry such as the Bajaj Group, Ansals, Vatika, AAI and MNC's like

Says Mr. Rajesh Handa, an FCA, AICWA, a Certified Oracle Professional and Director of EXA – “15 years of passionate hard work has made me win various awards and accolades but I feel satisfied that I have contributed to the growth of the Indian Business in my own small way.” And this view is shared by all the clients of EXA, not only from the Indian industry but also from renowned MNC's.

Their installations across the country and abroad have always felt a shortage of skilled manpower in this sector and that led them to take on new initiatives. The first step to bridge this gap was the setting up of **Exa Institute of Technology** where they provided training to all students directly. However, they also felt that it would take a long time for them to expand to a national level. They have now sought to further bridge this gap on a national scale by appointing **IIFCA Institute of Finance & Computer Accounting** as their **Education Partner**.

IIFCA is a leading certified educational Institute with International accreditations from TGA GMBH, Germany, International registrar technic and DRA –Deutscher Akkreditierungs RAT and registered with NCT, Delhi Govt. IIFCA will introduce the **erPro** training to all its students currently enrolled in various educational programs in their **40 centers across India**. IIFCA will also commence a new full fledged certificate course in **erPro**. The vision is to help IIFCA **expand to 100 centers** in India and grow with them.

EXA is a professionally managed organization with a strong, educated and passionate workforce engaged in developing, implementing and new research at its

Gurgaon facility. A State Of the Art Development Lab, housed in the same premises, employs the latest and cutting edge technologies and hardware in the development process. EXA is an **ISO 9001: 2000 Company** and is a Member of **NASSCOM, FICCI, CII, PHD Chamber of Commerce and Industry** and **Gurgaon Industrial Association**.

At EXA they are committed and see the year 2010 as the year of change, letting go of their past and creating better products for their clients and the Indian business at large. If you also wish to bring change to your business and work more efficiently please get in touch for more details.
