To whom it may concern

"Being the first implementation of erPro, we take the pleasure to having diversified business operations like, manufacturing, trading and Jobwork, erPro has assisted in streamlining for us

We have been working on this software since almost 15 years and are highly satisfied with its performance. MM Info has an excellent after sales service and support which is just a phone call away. Personal involvement of highly qualified and experienced management at designing level helps its implementation and fulfilment of our customisation requirements with desired and effective results. This ERP is scalable and expandable as it is developed on the Oracle, by far the most stable and reliable platform for such ERP software

The complete process of inventory management, material resource planning, financial management and HR management are automated through this ERP.

Transformation to GST has been excellent with very first invoice being generated through our ERP with GST on 1st of July itself. implementation of GST changes, and subsequent generation of GSTR reports for filing of returns has been a very smooth

The support and customisations are done very diligently and at a very low cost.

erPro has help us in saving lot of wastages and cost by controlling the processes over the years

So to say it is a cost effective ERP software and is the best value for money any company will get at such a low price"
