

“ We started working on “erPro” as a trading unit importing chemicals from Singapore. The software had all processes and compliances with regards to Import, inventory and sales procedures.

Gradually expanding our Business operations to manufacturing & Jobwork, erPro has helped us significantly managing all of them smoothly & effectively. MM Info’s team of experienced professional merged the complete data & operations into a single server.

Now coming up with a new Unit in Chennai, the management decided to implement “erPro”, instead of going for a local vendor, as they have always been providing support as & when required.”
